SUMMARY

Product-focused software engineer and hands-on technical lead with 10+ years of experience in web and mobile development. I co-own outcomes with Product Managers and Designers, from discovery and prioritization to delivery and iteration, optimizing for user experience, performance, and business results. Full-stack with a frontend emphasis (React, TypeScript, Node.js) and a background in React Native, I build and improve products based on user feedback and product needs. An early adopter of practical AI coding assistants and agentic workflows (Codex, Claude, Copilot) to accelerate development, improve quality, and refine engineering processes. Track record of impact at Omnora, Wallet Factory, and other companies.

SKILLS

Frontend: React (v18+), hooks, context and state management; TypeScript / JavaScript (ES5/ES6); Redux, Redux-Saga, MobX, Zustand; HTML5, CSS3, SASS, Tailwind CSS; Material UI, Bootstrap; Backbone, Konva.js, Canvas, WebRTC, jQuery, AngularJS

Mobile: React Native, Expo, Expo Router; Cordova / PhoneGap; Sencha Touch; Xcode, HockeyApp; App Store / Play Store delivery

Backend & APIs: Node.js, Express, Next.js, Sails; REST API, OpenAPI, GraphQL, WebSockets, Socket.io, JSON, JWT, Better Auth; MySQL, Sequelize, CouchDB/Cloudant API, Firebase API; Python, Django

Maps & Geospatial: Mapbox, Leaflet, GeoJSON

Practices & Tools: Spec-Driven Development (SDD); AI-assisted and agentic development (Copilot, Claude, Codex); product engineering, performance, accessibility; Playwright, Jest, Vitest, React Testing Library, Storybook, component/e2e/regression testing, QA; Git, Jira, Redmine; Figma; FFmpeg

Build & Delivery: Vite, Webpack, Docker, Docker Compose, GitHub Actions, CI/CD, Nginx

PROFESSIONAL EXPERIENCE

Omnora

Feb 2019 - Present

Principal Frontend Engineer

Frankfurt am Main, Germany (Remote)

- One of the more challenging parts was developing a backend microservice for video rendering, which handled video generation, combining multimedia tracks, applying overlays, and processing rendering tasks asynchronously. This involved optimizing resource-intensive operations, managing concurrent rendering jobs, and ensuring reliable communication between services.
- Developed a custom multimedia player using WebRTC and integrated platform features including text-to-speech, AI voiceover and dubbing, automatic subtitle and quiz generation, text-to-presentation, an in-browser audio/video editor built with Canvas API, and resume parsing for hiring workflows.
- Provided technical leadership through code reviews, mentorship and engineering best practices.
- Oversaw Jira reporting, sprint planning, recruitment, onboarding and professional development (1:1s, feedback); collaborated with stakeholders and facilitated team meetings.
- Designed and implemented a repository-specific AI development workflow using reusable agent skills and commands, covering ticket context gathering, implementation planning, test strategy generation, test case design, and post-implementation coverage reviews.

Tech Stack: React + TypeScript, Redux, MobX, Konva.js, Canvas API, WebRTC.

EARLIER PROFESSIONAL EXPERIENCE

Inprimex

Dec 2016 - Feb 2019

Senior Mobile App Developer

Kyiv (Remote)

- Outsourced developer delivering client projects, including Wallet Factory's MobiPay digital wallet ecosystem (see below), plus:
- Geometrica: real-time tracking and maps, using Mapbox, Leaflet and GeoJSON.
- Led the migration of Geometrica's admin panel from AngularJS to React.
- Quickcart: merchant back-office covering products, customers, roles/permissions and reports.

Stack: React, Redux, Redux-Saga, React Native, Cordova/PhoneGap, Backbone, Mapbox, GeoJSON, Next.js; App Store/Play Store delivery via Xcode and HockeyApp.

Wallet Factory

Dec 2016 - May 2018

Mobile Application Developer

Remote (via Inprimex)

- Contributed to Wallet Factory's digital wallet ecosystem (MobiPay), building white-label mobile wallet, loyalty and merchant-payment products across multiple brands and markets.
- Product features: QR/barcode payments, P2P transfers, invoices, refunds, payment status, mobile top-ups, card and wallet management, OTP/PIN authentication, profiles, KYC, push notifications, loyalty/bonuses/gift certificates, promotions, stores, maps and purchase history.
- Built consumer and merchant apps with REST API integrations and iOS/Android releases.
- White-label and partner deployments: MobiPay, MobiGift, Lotok, FORPOST, KhalisPay, o!dengi, TripWallet, Discard, PayLeh, Sosedi, Grosh, Mandarin, MedService.

Stack: React Native, Cordova/PhoneGap, Backbone.

Devngo

Dec 2014 - Dec 2016

Full-Stack Developer

Sievierodonetsk, Luhansk, Ukraine

- Built full-stack web applications with REST APIs using Node.js, Express.js, Sails.js and Sequelize.js, with AngularJS frontends.
- Developed a product-data parser for an online consumer electronics distributor using Scrapy and Django, integrated with OpenCart.

Repositories: github.com/alextkhnv/BCScraper | github.com/alextkhnv/BCProcessor

- Developed mobile applications using React Native, Redux and Sencha Touch.

Stack: Node.js, Express.js, Sails.js, Sequelize.js, AngularJS, React Native, Sencha Touch, Python, Scrapy, Django, OpenCart, MySQL, CouchDB/Cloudant API, Firebase API.

EDUCATION

Software Engineering - V. Dahl East Ukrainian National University, Sievierodonetsk, Ukraine, 2014

LANGUAGES

Ukrainian, Russian, English
